TEMPORARY TRAFFIC SWITCH

JAPHTA K. MASEMOLA ROAD, KHAYELITSHA

The City of Cape Town is continuing with the construction and upgrading of transport infrastructure along **Japhta K. Masemola Road/ Govan Mbeki Road** in Khayelitsha.

To accommodate ongoing construction activities and maintain traffic flow, a temporary traffic switch will be implemented along a section of the route near the R300 bridge crossing on **13 October 2026**.

What road users can expect

A revised traffic arrangement has been introduced, including an additional bypass near the Old Faure Road crossing. This bypass will safely transition traffic between carriageways while construction progresses.

- Eastbound traffic travelling on Japhta K. Masemola Road towards Maphongwana Avenue will stay on the newly constructed carriageway and will continue along the route in an easterly direction as normal.
- Westbound traffic travelling from Maphongwana Avenue towards the R300 will be temporarily accommodated on the newly constructed eastbound carriageway where they will cross over to the newly constructed westbound carriageway between Morningstar Drive and the R300 Bridge.
- From the R300 bridge to approximately 750 metres west of the crossing (towards Philippi East), traffic will operate on a dual-carriageway configuration.

All signalised intersections and pedestrian crossing facilities along the affected section will remain operational throughout the traffic switch to ensure continued accessibility and safety for motorists, pedestrians and public transport users.

The City encourages all road users to proceed with caution, adhere to temporary road signs and reduced speed limits, and allow additional travel time where necessary.
