

CONSTRUCTION NOTICE

TEMPORARY INTERSECTION CLOSURE

DUINEFONTEIN & GOVAN MBEKI ROAD, GUGULETHU

The City of Cape Town advises road users of a temporary intersection closure at Duinefontein Road and Govan Mbeki Road to facilitate the delivery and installation of pre-cast concrete beams as part of the Duinefontein Bridge construction.

The pre-cast beams are approximately 36 metres in length and weigh around 40 tonnes each. Heavy-duty cranes will be used to lift and accurately position the beams at the intersection.

What to expect

- Work will commence between **31 July and 5 August 2026**.
- The City will temporarily close the Duinefontein Road and Govan Mbeki Road intersection in 10-minute intervals to allow cranes to lift and position the bridge beams safely.
- During the delivery and installation operations, traffic will not be permitted to use the southbound lanes of Duinefontein Road heading towards Philippi.
- Traffic officials and signage will guide road users along alternative routes.
- Dates may change due to unforeseen circumstances.

Access to all homes and businesses will remain open.
