

PUBLIC NOTICE

TRAFFIC LANE SWITCH

GOVAN MBEKI ROAD, GUGULETHU

The City of Cape Town advises road users that a traffic switch will be implemented on Govan Mbeki Road between Heinz Road and Vygekraal Road from 6 October 2026 as part of ongoing transport infrastructure upgrades. The temporary traffic arrangement is anticipated to be in place for approximately eight months while construction work continues in the area.

What to expect

- A traffic lane switch will take place along Govan Mbeki Road, between Heinz and Vygekraal Road.
- Motorists travelling along Govan Mbeki Road between Heinz and Vygekraal roads will be redirected from the existing lanes onto the newly constructed northern (Manenberg-side) carriageway.
- Vehicles will travel in both directions using one lane in each direction.
- Cones and road markings will separate the lanes and guide drivers through the work zone.
- Access to all homes, businesses and public facilities will remain open.

Motorists are advised to plan ahead, expect delays and allow for extra travel time during this period. We appreciate your patience and cooperation as we work to improve our road infrastructure.
