PLEASE NOTE:
All bus gate openings to be verified on site
to be a min 1800mm clear opening.

GENERAL NOTES:

1. The copyright of this drawing is the property of the City of Chicago.
2. This drawing shall be used only for the project and location indicated. It shall not be copied or be carried into any office in accordance with the National Building Regulations and Municipal Local Ordinances. No part of this drawing shall be reproduced or any other authority must be adhered to.
3. The Architect assumes no responsibility for the results resulting from the use of this drawing for any other project or site.
4. The contractor and sub-contractor are to check all dimensions and quantities of work shown on this drawing in the contract documents prior to commencement of work on site. Any errors or omissions in the drawing, dimensions or discrepancies are to be reported immediately to the Architect's office.
5. The Architect is not responsible for the results of the setting out positions as the Architect's drawings to be used on site are not intended to be a substitute for the commencement of dry works.
6. The Contractor is to be responsible for the following:
 - a. Materials, fittings, drywires, etc., described under the heading of "SUPPLIES" to be used on site and to be either exactly as described or one to be in the Architects' office for approval.
 - b. The Contractor is to be responsible for the installation of those described. The Architect's drawings are not to be obtained in writing for departure from the original design and construction of the building, including manufacturing and/or external building.
 - c. The Contractor is to be responsible for compliance with respective manufacturers' directives and specifications.
 - d. The Contractor is to be responsible for the installation of those described. The Architect's drawings are not to be approved by the Structural Engineer before casting of concrete.
 - e. All structural concrete work, reinforced brickwork, retaining walls, etc., shall be approved by the Structural Engineer's drawings or approval.
 - f. The Contractor is to be responsible for the setting out and the setting out of the drawing and the Structural Engineer's drawings to be used on site.
7. The Architect requires seal/ies, mock-ups and specialists' approval of the drawings to be used on site. The Contractor is to be a standard to a partner's agreement, and to avoid any dispute, the Contractor is to be responsible for the documentation or warranty.
